MACHINES AND MATERIALS FOR YOUR CONSTRUCTION SITES

# MIXER TECHNOLOGY SRL

## Machine and equipment manufacturer for the building industry

**M**ixer Technology srl based in Torri di Quartesolo (Vicenza- Italy), was founded in the 1980's.

Since then, combining experience and technology, Mixer Technology has been planning, developing and producing machines for the building industry and above all mixing machines, plastering machines and transportation systems for premixed plasters.

Studying the components and the performances of such products, Mixer Technology has been able to face time after time the demands of different kinds of markets. As a matter of fact, Mixer Technology as well as being present in the Italian market is also present in foreign countries such as: Spain, France, Germany, Switzerland, Poland, Hungary, Bulgaria, Serbia, Turkey, Tunisia, UAE, China and South America.

Thanks to years of experience in the sector, our factory is able to offer to our Italian and our foreign customers a complete service which, beyond the sale, provides a support service that can intervene in the resolution of any technical problem.

To ensure optimum quality, Mixer Technology develops and manufactures in Italy all machines and subjects them to the most demanding European regulations.

### MACHINES AND EQUIPMENTS FOR BUILDING

Mixer Technology manufactures a **wide range of building machines** to respond to the different application requirements of the sector: **spraying machines, mixing machines, pneumatic conveying systems for powder products for mortar.**

Complemented by a wide range of compressors with different pressures and performances, according to the type of work and the machine used.

### ROTORS & STATORS PUMP

Mixer Technology has been **manufacturing rotors-stators for the construction industry since 1986**. Mixer has developed a complete range to satisfy every customer, regardless of its sector, and thus exceeds its expectations in terms of longevity and debit.

The model stators **1-2-3-4-5-6** are **suitable for all ready-to-use products based on lime, plaster, cement, self-leveling, glue and finishing products**, and can be used on all three-phase machines on the market.

For **single-phase spraying machines**, we have specific stators, of high quality like our models **13-26-30-32**.

# SUMMARY

<b>6</b>	Spraying machines for powder products
<b>17</b>	Electrical Trowel
<b>18</b>	Pneumatic Conveyor systems
<b>22</b>	Spraying machines for slurry products
<b>27</b>	Spraying machines with mixers
<b>29</b>	Continuous and closed mixers for powder products
<b>33</b>	Airless atomizers for fillers
<b>39</b>	Thermal compressors
<b>41</b>	Blowing machines
<b>43</b>	High pressure washers
<b>45</b>	Stators and rotors
<b>52</b>	Three-phase stators and rotors
<b>57</b>	Single-phase stators and rotors
<b>63</b>	High pressure stators and rotors
<b>65</b>	High output stators and rotors
<b>76</b>	Accessories for machines
<b>81</b>	Accessories for lances
<b>89</b>	Accessories for trowel
<b>90</b>	Rules
<b>91</b>	Spare parts
<b>106</b>	Profiles and sheets

## MIXER LIGHT PLASTER

Extremely compact continuous mixing pump with reduced weight and size. Easy to disassemble into 3 sections to ease transport. This pump is also ideal for filling joints, applying adhesives, resurfacing products, and interior and exterior finishes.

**APPLICATIONS:**

- Slurry products;
- Plaster, lime and cement-based surface coatings;
- Filling joints, applying adhesives, resurfacing products, and interior and exterior finishes.

- MIXER ADVANTAGES**
- EASY TO DISASSEMBLE INTO 3 SECTIONS
  - SINGLE PHASE
  - EASY TO TRANSPORT
  - PU MIXING CHAMBER

**OPTIONAL**

**VIBRATOR KIT**  
Ref: 8100001350

TECHNICAL DATA	
Product ref. (cat. C1)	915000200A
Hopper capacity	70 L
Power supply	230 V - 50 Hz
Thermal protection	yes
Gear motor	2,2 kW
Variable speed	yes
Integrated compressor (cat. C5)	8021022600
Water pump	yes
Flow meter	yes
Water shortage safety device	yes
Spraying flow rate	8 to 26 L/min*
Max. distance	40 meters*
Loading height	102 cm
Dimensions (l x w x h)	100 x 59 x 159 cm
Total machine weight	130 kg

(\* depending on the characteristics of the product used, the stator and the rotor, the diameter and length of the hose, the spraying height and the ambient temperature.

**EASE OF MAINTENANCE  
AND CLEANING THE PUMP**

This position allows easy maintenance (assembly / disassembly of the rotor and stator) and the cleaning of the hopper and mixing chamber.

Watch the demonstration video on our website: [www.mixersrl.com](http://www.mixersrl.com) or by typing: Mixer Light plaster on YouTube.

## MIXER SPRINTER

Compact continuous mixing pump, with reduced weight and size, easy to disassemble into 4 sections for simplified transport.

### APPLICATIONS:

- Powder products;
- Lime, plaster and cement-based surface coating;
- Filling joints;
- Resurfacing works, applying adhesives, interior and exterior finishes.

POLYURETHANE MIXING CHAMBER

### MIXER ADVANTAGES

- OPTIMUM MIXING QUALITY
- SINGLE-PHASE
- EASY TO DISASSEMBLE INTO 4 SECTIONS

## MIXER PLUS CLASSIC AND TOP

Mixer Plus Top and Mixer Plus Classic are three-phase (400 V) continuous mixing pump. The Plus Top model is fitted with a revolutionary self-diagnostic system that report any potential malfunctions. The Plus Classic model is equipped with an electromechanical control panel containing no electronic components.

### APPLICATIONS:

- Base coats coatings containing lime, cement;
- Finishing compounds, fillers;
- Coloured compounds, adhesives;
- Screeds.

### MIXER ADVANTAGES

- PLUS TOP MODEL EQUIPPED WITH SELF-DIAGNOSTICS SYSTEM
- REMOVABLE AND TILTING MIXING CHAMBER
- DRY PRODUCT SEPARATED FROM THE MIXING CHAMBER

## MIXER REMIX

Continuous mixing pump. Mixing is improved thanks to its two separate polyurethane mixing chambers.

### MIXER ADVANTAGES

- OPTIMUM MIXING THANKS TO THE DUAL MIXING CHAMBER
- EASY TO CLEAN DUE TO THE SEPARATE POLYURETHANE CHAMBER
- IDEAL FOR LARGE-SCALE WORKSITES
- CAN BE USED AS A CONTINUOUS MIXER ALSO

### APPLICATIONS:

- Base coats containing plaster, lime, cement;
- Finishing compounds, fillers, screeds;
- Resurfacing products, single-layer products, adhesives, etc

## MIXER AIRTECH STANDARD AND TOP

The Mixer Airtech silo compressor is ideal for pneumatically conveyable dry-mixed products contained in pressurised silos. The control panel is easy to use. The Mixer Airtech is fitted with an automated hose cleaning system in the event of loss of voltage.

- 1- Silo air hose 4 meters
- 2- Air hose with pneumatic valve 4m
- 3- Air hose 4m
- 4- Material hose 50m
- 5- Control cable for the level sensor 50m

### OPERATION :

**Step 1:** The Mixer Airtech system put the silo under pressure (hose n°1).

**Step 2:** Opening of the pneumatic valve to let the product run through the hose n°2 connected from the silo to the conveyor.

**Step 3:** The air flows through the hose n°3 liquid pushes the product through hose n° 4 to the sprayer. The cable n°5 is connected to the sprayer's sensor and also to the Airtech system.

The sensor detects when the product is missing inside the hopper, and gives the order to the Airtech system to start the cycle of transporting the product (step 1-2-3).

## MIXER ROL 14

The Mixer Rol 14 silo compressor is the ideal solution for conveying powder and pre-mixed products from a standard gravity fed silo to the sprayer.

- 1- Power supply cable
- 2- Tank air hose 4m
- 3- Control cable for the level sensor 50ml
- 4- Material hose 50ml

### OPERATION :

**Step 1:** the valve under the silo opens to drop the product inside the tank.

**Step 2:** closing of the tank.

**Step 3:** The Rol 14 system projects air into the hose 2, pushing the product through the hose n° 4 to the sprayer unit.

The cable 3 is connected with the sprayer's sensor and the Rol14 system.

The sensor detects when product is missing inside the hopper, gives the order to the Rol 14 system to start the transporting cycle of the material. (step 1-2-3).

# PNEUMATIC CONVEYOR SYSTEMS

DESCRIPTION	TYPE 100	TYPE 140
Product ref Rol 14 BECKER® (cat. C8)	980000300A	980000400A
Product ref Rol 14 RIETSCHLE® (cat. C8)	980001000A	980001100A

TECHNICAL DATA	TYPE 100	TYPE 140
Vat capacity	70 L	70 L
Power supply	400 V - 50 Hz	400 V - 50 Hz
Current	15 A	17 A
Power	5,5 kW	8 kW
Air flow rate	98 m3/h	140 m3/h
Spraying distance	100 meters*	140 meters*
System dimensions (l x w x h)	110 x 55 x 84 cm	110 x 55 x 84 cm
Vat dimensions (l x w x h)	65 x 55 x 100 cm	65 x 55 x 100 cm
System weight	164 kg	164 kg
Vat weight	70 kg	70 kg

(\* depending on the characteristics of the product used, the stator, the rotor, the diameter and length of the hose, the spraying height and the ambient temperature.

## DELIVERED WITH

Product ref. (cat. C5)	Description	Qty
3C03800201	PFG 86 / 42 TI probe	1
3F00700450	Spiral polyurethane hose 25 lm with Storz couplings	2
4910002000	STORZ spanner	2
8003002000	25 x 33 hose with Geka couplings L=2,7	1
8007001000	50 LM neoprene electrical cable 4x2,5 with plug	1
8007004001	50 LM neoprene probe cable 3x1,5 with plug	1
800804100A	MIXER PLUS complete bag filter	1

## OPTIONAL KIT SPEED ROL 14

Product ref. (cat. C5)	Description
8100001000	The SPEED ROL 14 KIT is installed on demand to increase product flow, thus accelerating the cycle

## OPTIONAL HOPPER + GRID + ROL 14

Product ref. (cat. C5)	Description
8008071000	The use of the hopper under/above the amphora is an alternative of the silo. The operator charges manually the bag in the hopper, which then fills the amphora.

## OPTIMIX 10

Compact and versatile machine. When you use it together with the Mixer 35, it becomes a comprehensive system ideal for all small-scale rendering works.

### MIXER ADVANTAGES

- PRACTICAL AND EASY TO HANDLE
- 230 V POWER SUPPLY
- EASY TO CLEAN
- STAINLESS STEEL TANK

### APPLICATIONS:

- Mortars;
- Adhesives;
- Joints and finishes.

TECHNICAL DATA	FOR ADHESIVES	FOR MORTAR
Product ref. (cat. C2)	9110006000	9110007000

## SINGLE-PHASE AND THREE-PHASE OPTIMIX 20

Versatile machine ideal compatible with any product with a grain size not exceeding 6 mm, with a drying time of minimum 60 min and a density enabling it to flow through the hose.

### MIXER ADVANTAGES

- COMPACT AND ERGONOMIC
- EASY TO USE
- PRACTICAL FOR TRANSPORT
- GRID WITH BUILT-IN VIBRATOR
- 80 L CAPACITY
- HIGH GRANULOMETRY: UP TO 6 MM

### APPLICATIONS:

- Pre-mixed surface mortars;
- Special products;
- Cement screed.

# SPRAYING MACHINES FOR SLURRY PRODUCTS

## OPTIMIX 50

Versatile electric spraying machine for outdoor projection. Both powerful and easy to use, it adapts to all building projects. Its large-diameter inflatable wheels and its 4 lifting rings make it a very practical machine to move around. It can be equipped (as an option) with a 75 L tank extension or a vibrating strainer for a better descent of the product to the bottom of the tank.

### APPLICATIONS:

- Hydraulic coatings;
- Mortars;
- E.W.I.

### TECHNICAL DATA

Product ref. (cat. C2)	3B03308000
Tank capacity	120 L
Supply	Trifase 400 V - 32 A
Compressor	two-cylinder oilless
Compressor flow rate	366 L/min
Compressor power	2,2 kW
Motor power	7,5 kW variable speed
Product flow rate	0 to 50 L/min
Max. pressure	0 to 40 bar*
Max. grain size	6 mm
Pump	MAP 11
Max. hose length	60 meters
Delivery height	50 meters
Dimensions (L x w x h)	244 x 77 x 88 cm
Total machine weight	340 kg

(\* depending on the characteristics of the product used, the stator, the rotor, the diameter and length of the hose, the spraying height and the ambient temperature.

### OPTIONAL

#### Description

75 L tank extension

### OPTIONAL

#### Description

Vibrating strainer

### OPTIONAL

#### Description

75 L tank extension + vibrating strainer

### DELIVERED WITH

Description	Qty
33 m hose Ø35	1
MAP 11 pump	1
Spraying lance	1
Eight nozzles (Ø8, 10, 12, 14, 16, 18, 20 & 22)	1
Three grouting nozzles (Ø10, 12 & 14)	1
Storage carry-case	1

## OPTIMIX 40 + MIXER 70 SET

Special set, composed with a spraying machine and a sequential mixer. A vibrator is attached to the tank of the machine for a better descent of the product towards the bottom. The mixer is equipped with a double helical paddle on a horizontal arm which ensures a rapid and homogeneous mixing, a water doser, a speed control and a rotation direction reversing function.

EU90566	Cleaning ball Ø 50	2
EU90605	Tube brush	1
EU101013	7mm Allen key	1

### APPLICATIONS :

- Wide variety of applicable products including powder and ready-to-use.
- **EXTERIOR:** glues and E.W.I. fillers, thick plastic coatings, light hydraulic fillers.

## MIXER 35 TOP E BASIC

The Mixer 35 can be fitted with a water pump upon request. Its new mixing chamber is made out of which facilitates cleaning. The flow meter allows you to accurately view the water dosage.

### TOP VERSION

**APPLICATIONS :**

- Adhesives, tile glues, joints;
- Adhesive mortars, gypsum plasters;
- EWI;
- Pre-mixed screeds;
- Plaster and finishing coatings in powder form.

912000600A	Optimix 20 single-phase 3 kw
912000250A	Optimix 20 three-phase 5,5 kw

# MIXER CONTINUOUS AND SEQUENTIAL

## MIXER 100

The Mixer 100 is fitted with a twin spiral blade on a horizontal shaft allowing for the fast and homogeneous mixing of all types of powder products. Mixer fitted with a speed regulator and automatic forward/backward running function, with electronic water dosing.

### MIXER ADVANTAGES

- HIGH-CAPACITY TANK: 100 L
- DIGITAL PANEL
- MIXING QUALITY
- EASY TO USE
- WATER QUANTITY SETUP

### APPLICATIONS :

- All types of powder products
- All bi-component products
- Sand or lime to mix with water

### TECHNICAL DATA

Product ref. (cat. C9)	3B03603000
Hopper capacity	100 L
Power supply	230 V / 50 - 60 Hz
Current	6,5 A
Motor power	2,2 kW
Forward/backward rotational speed	36 to 84 rpm
Dimensions in low position (l x w x h)	129 x 74 x 84 cm
Drainage height in low position	41 cm
Dimensions in high position (l x w x h)	129 x 74 x 126 cm
Drainage height in high position	72 cm
Total machine weight	107 kg

## MIXER FLATSPRAY 10

Mixer Flatspray 10 enables application of all types of pasty film fillers. It is a compact, quiet and light machine. It can be moved up and down stairs by only one person, thanks to its trolley-type chassis. The cleaning procedure is quick and only has to be done at the very end of the project. The pump can be changed in 5 minutes directly on the construction site.

### MIXER ADVANTAGES

- TRANSPORTABLE BY ONE PERSON
- EASY TO USE AND VERY INTUITIVE
- ROBUSTNESS
- EASY TO CLEAN
- EASY MAINTENANCE
- LONG LASTING ROTOR STATOR

### APPLICATIONS :

- All types of airless plasters;
- Smoothing coating, raking coating, casing coating, bituminous coating, etc.

### TECHNICAL DATA

Product ref. (cat. C10)	3B03206000
Maximum working pressure	80 bar
Maximum product flow-rate	4,5 L/min*
Tank capacity	45 L
Power	230 V / 50 - 60 Hz
Electric motor	1,5 kW
Type of pump	volumetric screw pump
Pump	JET 1
Max. nozzle	0.045"
Granulometria max	1,5 mm
Dimensions (l x w x h)	66 x 43 x 71 cm
Total machine weight	53 kg

(\*): depending on the characteristics of the product used, the stator, the rotor, the diameter and length of the hose, the spraying height and the ambient temperature.

### OPTIONAL

## MIXER FLATSPRAY 15

Mixer Flatspray 15 allows for the application of all types of thin film coatings. It is a compact, quiet and light machine. It can be moved up and down stairs by only one person, thanks to its trolley-type chassis. The cleaning procedure is quick and only has to be done at the very end of the project. The pump can be changed in 5 minutes directly on the construction site.

### MIXER ADVANTAGES

- MAXIMUM WORKING PRESSURE 120 BAR
- TROLLEY-TYPE CHASSIS
- ROBUSTNESS
- EASY TO CLEAN
- EASY MAINTENANCE
- LONG LASTING ROTOR STATOR

### APPLICATIONS :

- All types of ready-to-use film plasters;
- Smoothing coating, raking coating, casing coating, bituminous coating, etc.

## MIXER FLATSPRAY 30

Mixer Flatspray 30 is fitted with a valveless pump for easy maintenance, a stainless steel round tank and a Ø35 mm drain valve to facilitate cleaning. Its large inflatable wheels allow the machine to be easily moved, even when the tank is full.

### APPLICATIONS :

- All types of ready-to-use film plasters: smoothing coating, raking coating, casing coating, bituminous coating ...
- Droplet-finish surface coatings\* and other products.  
\*with optional droplet-finish kit and compressor

### TECHNICAL DATA

Product ref. (cat. C10)	3B03204000
Tank capacity	110 L
Power supply	230 V / 50 - 60 Hz
Max. operating pressure	120 bar
Max. spraying flow rate	7 L/min*
Motor power	3 kW
Max. spraying distance	60 meters*
Type of pump	volumetric screw pump
Pump	JET 3
Max. nozzle	0.055"
Dimensions (l x w x h)	143 x 65 x 97 cm
Total machine weight	100 kg

### OPTIONAL

Product ref. (cat. C5)	Description
EU30767	Paint Kit

(\* depending on the characteristics of the product used, the stator, the rotor, the diameter and length of the hose, the spraying height and the ambient temperature.

### DELIVERED WITH

EU11085	1 L storage liquid	1

## MIXER FLATMIX 100

Mixer Flatmix 100 is a high-output assembly specialised in spraying powder surface coatings in addition to ready-to-use products.

### APPLICATIONS :

- Smoothing coating;
- Raking coating;
- Casing coating;
- Bituminous coating.

# ELECTRIC OR THERMAL Mix'Air

The Mix'Air compressor is designed for intensive use on all types of worksites. Its trolley-mounted assembly and folding arm makes the compressor easy to move. It is fitted with an air outlet with a Geka coupling, an autonomous valve managing the pressure inside the tank, and a high-performance compression head.

**MIXER ADVANTAGES**

- HYBRID COMPRESSOR
- ADAPTED TO SUIT YOUR WORKSITES!
- SOLD WITHOUT THE MOTOR!
- FAST MOTOR REPLACEMENT (IN 5 MIN.)

**APPLICATIONS :**

- Sprayer;
- Mini-sand blaster;
- Pneumatic scraper;
- Slurry & paint spray gun,;
- Tire inflator gun;
- Pneumatic stapler, etc.

UNIQUE ON THE MARKET

SINGLE-PHASE 2.2 KW

THREE-PHASE 3 KW

COMBUSTION 6.5 HP

COMBUSTION 9 HP

FOLDING ARM

GEKA AIR OUTLET

AIR CONTROLLER

ANTI-VIBRATION FEET

PRESSURE GAUGE PROTECTION DEVICE

The Mix'Air compressor can be adapted to suit your worksite's requirements! Sold without the motor (choose between an electric or a thermal engine)

**COMPRESSOR ONLY**

Product ref: 3B02810000 - (cat. C11)

Weight: 41 KG

## MIXCLEAN 15-200 AND MIXCLEAN 18-280

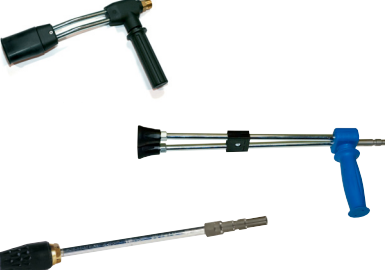

Mixclean 15-200 and 18-280 are light-weight, robust cleaners. Recommended for intensive use on all types of worksites. Fitted with a thermostat valve, water inlet and spray lance hose reels, an oil shortage safety device, a spray gun with rotating coupling, a dual spray lance, and a spray lance with rotating nozzle. Easy to handle thanks to the large wheels and reinforced frame. Designed for easy maintenance.

# STATORS AND ROTORS

Mixer Technology SRL has been producing rotors and stators for the construction industry since 1986. Since then, we have created a wide range of products to satisfy the requirement in term of durability and flow-rate requested by our customers.

Pumps 1, 2, 3, 4, 5 and 6 are adapted to every premixed gypsum based, gypsum-lime based, cement-lime based plasters, floor-screeds, glues and finishing products and can be used with all three-phased machines in the market. As for single-phased machines, we advise to use the pumps 13, 26, 30 and 32.

### The different models of rotor head

Slit	Bayonet	Slit and holed

Slit and holed	Holed Slit and holed	Squared

Squared and holed	Hexagonal

### Type of rotor material:

<b>HR</b>	<b>C</b>
Special high strength material	Steel material for standard performance (not gypsum)

### Rotation of mixer:

Direction of rotation of the mixer

### Essential:

<b>ANTIGRIP</b> To facilitate the assembly of every models of rotors

## COMPRESSOR GROUP

Reference (cat. C5)	Description
<b>8021008000</b>	Compressor group for Plus Mono and CD25
<b>8021008050</b>	Compressor group for Plus Mono Pressure switch kit

### Compressor characteristics

Power supply	230 V
Power	50 Hz
Max pressure	0,6 bar
Compressor flow rate	200 L/min

<b>8021007300</b>	Compressor group for Optimix 20 - 230 V
<b>8021022800</b>	Compressor group for Optimix 10 with support
<b>8021022700</b>	Compressor group for Sprinter plaster and EW.I. with support
<b>8021022600</b>	Compressor group for Light
<b>8021008030</b>	Compressor group for Plus Mono vers. 2021

### Compressor characteristics

Power supply	230 V
Power	50 Hz
Max pressure	10 bar
Compressor flow rate	230 L/min

<b>8021023000</b>	Compressor group 3 heads 230 V
-------------------	--------------------------------

### Compressor characteristics

Power supply	230 V
Power	50 Hz
Max pressure	10 bar
Compressor flow rate	322 L/min

<b>8021023000</b>	Compressor group 2 heads 400 V
-------------------	--------------------------------

### Compressor characteristics

Power supply	400 V
Power	50 Hz
Max pressure	10 bar
Compressor flow rate	230 L/min

<b>9002005000</b>	Compressor group Bora with magneto-thermal for Plus Standard, Classic, Top, Remix, Mustang, Optimix 20 - 400 V
-------------------	--

### Compressor characteristics

Power supply	400 V
Power	50 Hz
Max pressure	5,5 bar
Compressor flow rate	195 L/min

EUM07056	Turning connector for Mixer Airless lance (B)
EU12766	Complete magnetic sensor (C)

# ACCESSORIES FOR LANCES

## DROPLET SPRAYING KIT

Reference (cat. C5)

Description

EU30582

Droplet spraying kit

## INJECTION KIT

Reference (cat. C5)

Description

8100400000

Injection kit for finishing lance

The Injection Kit is installed between the material tube and the finish lance. This accessory is used during the wall restoration process.

When the pressure gauge reaches setted bar, the pressure switch controls the machine to stop the material pumping system

Watch the demonstration video on our website: [www.mixersrl.com](http://www.mixersrl.com) or by typing: injection kit Mixer on YouTube.

EU11760	Ø 8, 10, 12, 14, 16, 18, 20, 22 nozzles set

EU11759	Ø 10, 12 and 14 grouting nozzles
---------	----------------------------------

## ABS LANCE CARRY-CASE

Reference (cat. C5)	Description
EU90657	Complete ABS lance carry-case 3/4"
EU90656	Complete ABS lance carry-case 1"

### It contains:

- 1 ABS spray lance
- 8 spray nozzles (Ø8, 10, 12, 14, 16, 18, 20 & 22 mm)
- 2 cleaning balls Ø30
- 1 cleaning pin
- 1 Ø7mm Allen key

## ALUMINIUM LANCE FOR ABRASIVE PRODUCTS CARRY-CASE

Reference (cat. C5)	Description
EU90654	Complete aluminium lance for abrasive products carry-case

### It contains:

- an Aluminium spray lance (special for slurry abrasive products)
- eight spray nozzles (Ø3, 4, 5, 6, 7, 8, 9, 10 & 12 mm)
- two cleaning balls Ø50
- a cleaning pin
- a Ø7mm Allen key

# ACCESSORIES FOR LANCES

## E.W.I. LANCE CARRY-CASE

Reference (cat. C5)	Description
EU12045	E.W.I. lance carry-case
	<b>It contains:</b>
	<ul style="list-style-type: none"> <li>• an E.W.I. ABS spray lance</li> <li>• an air regulation kit</li> <li>• a threaded ring for mounting grouting nozzles</li> <li>• three grouting nozzles (Ø10, 12 &amp; 14 mm)</li> <li>• five spray nozzles (Ø6, 7, 8, 10 &amp; 12 mm)</li> <li>• a cleaning ball Ø30</li> <li>• a cleaning ball Ø50</li> <li>• a Ø7mm Allen key</li> <li>• a cleaning pin</li> </ul>

## COMPLETE ABS MORTAR LANCE - 1" COUPLING

Reference (cat. C5)	Description
EU11833	Complete ABS mortar lance - 1" coupling
	<b>It contains:</b>
	<ul style="list-style-type: none"> <li>• a mortar ABS spray lance</li> <li>• eight spray nozzles (Ø8 to 22 mm)</li> <li>• three grouting nozzles (Ø10, 12 &amp; 14 mm)</li> <li>• two Ø50 cleaning balls</li> <li>• a cleaning brush</li> <li>• a cleaning pin</li> <li>• an unplugging pin</li> <li>• three Allen keys Ø3, 4 &amp; 7</li> </ul>

## CARRY CASE FOR MORTAR TRADITIONAL SPRAY LANCE

Reference (cat. C5)	Description
EU30808	Carry case for mortar traditional spray lance
	<b>It contains:</b>
	<ul style="list-style-type: none"> <li>• a traditional mortar ABS spray lance</li> <li>• eight spray nozzles (Ø8 to 22 mm)</li> <li>• three grouting nozzles (Ø10, 12 &amp; 14 mm)</li> <li>• two Ø30 cleaning balls</li> <li>• two Ø50 cleaning balls</li> </ul>

## NOZZLES FOR ATOMIZERS

### BREAKDOWN OF A NOZZLE REFERENCE CODE:

**First Number** = angle of jet in degrees,

**Second and last** = bore of the nozzle in thousandth of an inch

E.G.: 417: 4 = 40° angle of jet and 17 = bore of 17 thousandths of an inch,

To order a nozzle, replace the **XXX** of the reference by the number of the nozzle chosen,

E.G.: reference **EUW553417**

**THE LARGER THE ANGLE IS, THE WIDER THE PAINT JET WILL BE.**

**THE LARGER THE BORE IS, THE LARGER THE PRODUCT FLOW-RATE WILL BE.**

Reference: EUW553XXX (cat. C5)

TO BE USED FOR	MODEL	REFERENCE	DESCRIPTION
CEMENT BASED PLASTERS 400 X 50 MM		3M00300201	To be used for medium to warm temperatures (above 15 degrees Celsius). Usable for interior or exterior walls.
		3M00300203	To be used during winter when the materials take longer to dry (between 5 and 10 degrees Celsius).
		3M00300204	To be used for mild temperatures (around 15 degrees Celsius)

TOP COAT LAYER OF EXTERIOR WALL INSULATION SYSTEM 400 X 50 MM		3M00300212	To be used for the top coat of the EWI system. The choice of the sponge is determined by the technology of the material and the type of finish the user wants to obtain.
		3M00300213	
		3M00300210	
		3M00300214	
		3M00300211	

		3M00302700	This disc is to be used to smoothen traditional mortars and external wall fillers.
		3M00302703	The discs with four or six blades are to be used to smoothen gypsum based plasters.
		3M00302709	
		3M00300220	Disc to be used to obtain a scraped finish.

# SUPPLY GENERAL TERMS AND CONDITIONS

These general terms and conditions apply to every sale and supply of goods between:

Mixer Technology S.r.l., with registered office in Torri di Quartesolo (province of Vicenza, Italy) Via Dei Carabinieri no. 44/45, tax code and VAT no. 03725830248, in person of its legal representative Mr. Patrick Borel, building machinery company and exclusive distributor of the EUROMAIR brand for Italy, hereinafter called the Supplier and the company called the "Purchaser". The Supplier and the Purchaser are collectively referred to as the "Parties"

Whereas

a. The Purchaser is an Italian-law company dealing with the wholesale of machinery, equipment, technical appliances, construction materials and goods sold in Italy and abroad (the "Products" or "Materials"), as per the catalogue annexed to this agreement, and which forms an integral part of the same (Appendix A);

b. The Purchaser is interested in buying the Products from the Supplier;

c. the Supplier shall supply the Products using its own efficient organisation, resources and personnel and confirms that it has adequate planning, production - related and

organisational capabilities.

d. The relationship between the Parties shall be fully independent, both in economic and financial terms, and with this Agreement they intend to stipulate the conditions for the supply of the Materials only.

Therefore the Parties agree as follows.

## 1) Premises

The premises and the annexes are integral and essential parts of this agreement.

## 2) Conditions agreed between the Parties

2.1 These Terms and Conditions shall apply to and are integral parts of every order commissioned by the Purchaser and they will regulate the relationship between the Parties. The application of other agreements is expressly forbidden and any amendments to this Agreement must be settled in writing.

2.2 The Supplier's offers and/or quotations aren't binding. The information supplied in the catalogues, brochures and pricelists are non-binding and may be modified by the Supplier; for each purchase, reference should be made to the specific context of the purchase order and corresponding confirmation.

## 3) Object

The Supplier shall supply its products to the Purchaser who hereby agrees to buy them, under the terms and conditions of this Agreement, with the purpose of marketing them. Anyway, the Supplier will not be held liable or in default for late or non-delivery, except in cases of fraud or gross negligence.

## 4) Orders and order confirmations

4.1 The orders of the Purchaser shall indicate the number of the order, the exact description of the ordered goods and the product code, quantity, unit and total price, terms of payment, destination and any other instructions for the delivery. The Supplier shall not be held liable for non-delivery due to the incomplete or inaccurate compilation of the purchase order by the Purchaser. The Purchaser which is established in Italy shall indicate exactly its personal data as well as the "recipient code" for the purposes of subsequent electronic invoicing.

4.2 The order is deemed accepted from the Supplier when the Purchaser receives the Order Confirmation. The sale contract will be concluded when the Purchaser accepts the Order Confirmation or, in any case, after three days from the Order Confirmation sending, without any Purchaser's communication of revocation, cancellation or termination.

## 5) Characteristics of products

5.1 In issuing the purchase order, the Purchaser acknowledges to have carefully analysed the technical, functional and aesthetic characteristics of the Products and to deem them suitable for the purpose they will be directly or indirectly used for.

5.2 With specific written approval from the Supplier, which shall be considered an essential condition, the sale of a Product may be preceded by a demonstration; in that case, only the Supplier operators shall be authorised to handle the equipment during the demonstration. The Purchaser

will provide, at its own expenses, the resources and products useful for the demonstration (e.g. power, water, air, paints, coatings etc.). The Purchaser will take all the necessary precautions in order to guarantee the safety of personnel during the demonstration, and the Supplier may not be held liable for any injury to people and/or damage to property.

## **6) Delivery**

6.1 Unless otherwise indicated, the delivery shall be Ex Works from the site in Torri di Quartesolo (province of Vicenza, Italy), Via dei Carabinieri n. 44/45. From the delivery to the Purchaser, to the courier or to the carrier and, in any case, from the moment the products are made available to the Purchaser, the risk of their loss shall be passed to the Purchaser.

6.2. Unless expressly agreed otherwise, the terms of delivery are provisional and non-binding.

6.3 Delays in delivery may not entitle the Purchaser to terminate the sale, or ask for compensation for damage and/or interest.

6.4 In case of missed withdrawal or in case of impossibility to deliver the Products not attributable to the Supplier, if the materials are stored in the Supplier's premises, the Purchaser shall pay a penalty for delay, in addition to the value of the supplies, in an amount equal to 0.5% of the not delivered goods total value for each week of storage after the first 10 days; the Supplier will be entitled to keep the materials until the receipt of the payment of the penalty for delay; furthermore the order may be terminated due to fault of the

Purchaser, pursuant to article 1456 civil code.

## **7) Communications**

Orders, order confirmations, waybills and invoices will be exchanged as hardcopies (by fax) or by email. To the Purchaser which is established in the Italian territory, the invoices will be sent through the SDI system managed by the Inland Revenue.

## **8) Prices and terms of payment**

Prices and terms of payments are indicated in the order confirmation and stated on each invoice. If the order confirmation provides for one or more payments prior to the delivery of products, non-payment of such advances on the agreed dates shall entitle the Supplier to suspend the delivery and/or any other activity, without prejudice to the Supplier's right to compensation for damages.

## **9) Delayed payment or non-payment**

9.1 The payment will be due entirely within the agreed terms even in case of delayed delivery or in case of damage or loss during transportation, not attributable to the Supplier.

9.2 In case of delayed payment, the Supplier may suspend every further delivery.

9.3 The non-payment of even a single invoice on its due date shall result that all the other outstanding invoices become immediately due and payable, pursuant to art. 1186 civil code, even if the invoices are related to different orders.

9.4 If the Purchaser is involved in insolvency procedure, also alert or assisted composition, has become insolvent or has, upon its own fault, reduced

the guarantees given, or fails to provide the Supplier with the requested guarantees, the Supplier may demand payment immediately, regardless of whether the agreed payment period was in favour of the Purchaser, pursuant to art. 1186 civil code.

9.5 The non-payment or delay of payment for more than 8 working days, of even a single supply, shall lead to termination of the contract pursuant to art. 1456 civil code. In any case, all delayed payments shall be subject to default interest, charged in accordance with legislative decree 231/02, plus compensation for greater losses and any costs incurred by the Supplier.

## **10) Reservation of title**

10.1 In case of instalments payment and/or deferred payment, until full and final settlement of the invoice, the Products supplied shall be considered property of the Supplier pursuant to art. 1523 civil code. The risks will be borne by the Purchaser since the delivery.

10.2 In case of delayed payment of a single instalment, the Supplier may demand the termination of the contract and any sum already collected by the Supplier shall be retained by the latter as an indemnity for the use of the Products, pursuant to art. 1526, co. 2 civil code. The supplier shall be entitled to take action for any cost incurred to recover possession of the products, and for any loss resulting from damage to the same.

## **11) Complaints and warranty**

11.1 Any complaints regarding the quantity or integrity of the

packages or products must be reported directly to the carrier at the time of delivery, by marking the waybill or delivery note with the words “provisionally accepted”.

11.2 Any defects in the Products delivered must be reported to the Supplier in writing, by registered post or certified email, within eight days from the date of delivery. The unverifiable defects at time of delivery must be reported to the Supplier in writing, by registered post or certified email, within eight days from the date of their discovery and, in any case, within one year from the date of the delivery.

11.3 Any difference in the quantity of goods delivered compared to the order shall not entitle the Purchaser to terminate the contract nor to suspend the payments, but only to the completion of the consignment with the missing goods.

11.4 The Purchaser shall not use any defective products.

11.5 The Supplier’s warranty is granted for 12 months from the date of delivery for Products in normal conditions of conservation, and after defects have been reported, in accordance with the procedure indicated in paragraph 11.2 above. The warranty only concerns the defects that make the products unsuitable for the use they’re intended for or the defects that appreciably decrease the value of the products.

11.6 The warranty shall not cover any defects or damage deriving from normal use, any accident not attributable to Supplier, any changes made by a person other than the Supplier, incorrect use, storage or treatment of the

Products.

## **12) Return goods**

12.1 Except in exceptional circumstances with prior written approval, the Supplier doesn’t accept return goods. Every return must be preceded by a written claim from the Purchaser and it must be previously authorized in written by the Supplier.

12.2 The shipping charges shall be covered by the Purchaser.

12.3 In case of return, the Supplier reserves the right to examine the return goods to verify the applicability of the warranty referred to the point 11); if the warranty isn’t applicable, the return goods will be returned to the Purchaser and the shipping charges shall be cover by the latter.

## **13) Assignment of contract**

The Purchaser may not assign this Agreement or any individual supplies to any third party, without the written authorization of the Supplier.

## **14) Termination**

14.1 Either Party may terminate this Agreement by giving three months’ advance notice in written by registered letter or certified email, without prejudice to the validity of this agreement for the already made orders.

14.2 The Supplier may withdraw, without notice, in the case of: commencement of actions or proceedings for the liquidation of the Supplier; - interruption or suspension of the Supplier’s production operations; - the Supplier is subjected to insolvency procedure; - the Supplier has declared in writing that it cannot meet its obligations according to the terms of the

Agreement or of the individual orders.

## **15) Termination clause**

Pursuant to art. 1456 civil code, the Supplier may withdraw from the contract with written notice in the event of: - failure to comply with the terms of delivery referred to the point 6.4 ; - non-payment or delayed payment referred to the point 9.5; - the commencement of the Purchaser liquidation proceedings; - interruption or suspension of the Purchaser’s production operations; - if the conditions referred to the point 9.4 occur; - in any case of serious breach of contract by the Purchaser.

## **16) Communications**

All the communications between the Parties will be valid if they reach the stated addresses.

## **17) Governing law**

For all matters not expressly agreed herein, this Agreement shall be governed by, and construed in accordance with, the law of Italy, with the express exclusion of the provisions of the 1980 Vienna Convention on the international sale of goods.

## **18) Jurisdiction**

Except in cases where the jurisdiction of a different court is provided by law, the Parties submit all their disputes arising out of or in connection with this Agreement to the exclusive jurisdiction of the Courts of Vicenza.

## **19) Privacy**

The Supplier shall process the Purchaser’s data electronically and/or manually, in accordance with the principles of legality and

fairness and in accordance with legislative decree 196/2003 and of the EU / 2016/679 regulation. Personal data may be used directly by The Supplier or through trusted service providers (banks, credit institutions, insurance companies, administration and/or IT services providers, debt recovery agencies), in their capacity as data controller or data coordinator but only to comply with the legal obligations including fiscal and accounting obligations and the contractual obligations.

In consideration of the existence of electronic computer links or electronic correspondence with the above parties, the data may be transferred abroad.

Without prejudice to the right of the Purchaser to exercise the access right to personal data under art. 15 of the 2016/679 EU regulation and the rights provided for by articles 16, 17, 18, 21 of EU Regulation 2016/679 regarding rectification, cancellation, portability, limitation to treatment and the right to object, in the manner established by art. 12 of the 2016/679 EU Regulation.

Declaration pursuant to and for the purposes of art. 1341 of the Civil Code: the Purchaser declares to approve specifically the following conditions: 2.2) changes and variations; 3) object; 5.2) restricted liability during demonstration; 6) delivery; 9) delayed payment or non-payment; 10) reservation of title; 11) complaints and warranty; 12) return goods; 13) assignment of contract; 14) termination; 18) jurisdiction.
